

Software built for real-world workflows. 9punk LLC is a Texas-based software development company building custom web applications, internal business systems, workflow automation, and digital modernization for commercial and government organizations.

01 CORE COMPETENCIES

01 Custom Web Applications

Purpose-built apps that replace spreadsheets, paper processes, and off-the-shelf tools that don't fit.

02 Portals & Dashboards

Role-based portals for staff, providers, and clients with live status and reporting.

03 Workflow Automation

Intake, scheduling, notifications, and handoffs automated across cloud and Google Workspace services.

04 Data Migration

Moving records and sites off legacy platforms into maintainable systems without losing history.

05 Forms & Reporting

Validated intake and submission forms with audit-friendly records and exportable reports.

06 Section 508 Accessibility

Interfaces designed and tested to WCAG 2.1 AA, the federal accessibility standard.

02 DIFFERENTIATORS

- **Built by an operator.** Hands-on experience running the scheduling, referral tracking, credentialing, and reporting workflows these systems support.
- **Direct access.** You work directly with the developer who builds your system, from scoping to delivery.
- **Lean, modern cloud stack.** Fast delivery, low hosting overhead, and clean handoff with documentation.

03 SELECTED EXPERIENCE

- Contract-operations platform for a federal wellness program: one administrator manages patients and subcontracted providers, with assignments, scheduling, and invoicing.
- Patient-management platform for a VA Community Care Network service provider: referrals, scheduling, and documentation.
- Provider follow-up and referral-recovery portal.
- Session-logging and appointment-tracking applications for therapy practices.
- Website migrations from WordPress to modern static hosting for local businesses.
